

**USR Generator TEC 40D**

# **CARRYING POWER WITH YOU**

Compact and lightweight | efficient operation | Silent and low odor emissions

**Diesel** Inverter Tech™  
Generator

## Fertures

### POWER PROVIDE TO MEET VARIOUS NEEDS

**Experience a comfortable and pleasant climate without City power**

- 230 volt AC - home standard
- Suitable for powering sensitive electronic products
- Contains remote control
- Stainless steel body shell reduces noise hazard
- Charges the battery with automatic start function
- Use of new technologies

# New Technologies

## NEW TECHNOLOGIES

### Create endless possibilities

The TEC40D can regulate the output of the power through the load, so the fuel consumption is very low.

In addition, not only short circuit protection and overload protection  
Two generators can be connected in parallel

# Diesel Engine

## Diesel

**Power Stronger and lighter weight**

- Stronger power ,compact size and lighter weight 68kg only.
- Noise level only **65**db.
- TEC40D Diesel generators increase energy efficiency by 50% per kilogram compared to conventional generators
- Also reduced in weight and mounting controls
- Variable-speed electromagnetic alternator makes the generator stronger

**QUALITY POWER**

**YOU NEED IT**

**Solve the troubles of no grid power supply**

It provides  
Pure sine wave Power  
Also adapts it to sensitive power equipment

No matter where you are  
In the absence of utility power  
You are free to use air conditioning,  
Electronic equipment such as microwave ovens

**Friendly human-computer interaction**

## **Remote Control**

**Easy to operate, safe and worry-free**

The display panel with lighting system makes operation very easy, showing the relevant voltage, amperage, and start-up by alphanumeric Current, chronograph, etc., as well as a variety of alarm functions. No matter where you are

**Remote control**  
**Remote start and stop in 30 meters**

## Easy to view fuel level

### Smart fuel tank and control panel

Let you do not worry about when you need to refueling  
When you adjust to the Fuel level display on the control panel,  
the precision fuel level shows %

20-litre stainless steel smart fuel tank, full load may last for **20** hours

The fuel tank also supports custom ordering, which can be customized according to the customer's model.

## Product parameters

### TEC 40D Diesel Generator

**[Voltage]** AC 230V Pure sine wave

**[Noise Level]** 57-78db(7meters)

**[Rated Output]** 3500W

**[Size]** 510\*420\*500mm(Length \* width\* height )

**[Max.Output]** 4000W

**[Weight]** 68kG

**[Engine Power]** 6.0kW(8.0PS)

**[Suspension Width]** 580mm

**[Fuel]** Diesel

**[Quality Characteristics]** overload , short circuit , lack of oil protection

**[fuel consumption]** up to 1.2L / h

**[Detection mark]** CE, E13

**[Startup Mode]** Remote Start

**[Fuel Tank Capacity ]** 20 Liter (Optional)
